

City University/Vysoká škola manažmentu (CU/VSM) has announced the establishment of The Center for Advanced Business Studies (CABS) that will offer corporate training and seminars to business and not-for-profit organizations in Slovakia. With practical training and seminars provided by CABS, in cooperation with the business education and English-language programs at CU/VSM, its programs make efficient use of the vast accumulated business experience and know-how of CU/VSM. The CABS business program offers a Corporate Training Program, a Business English Training Program, and a Corporate Program to improve the organizational performances of our corporate clients through a variety of training methods. Our programs focus on training employees to solve problems, think critically and strategically, and complete work quickly and efficiently. Participants will get theoretical knowledge about how to accomplish these goals, but we'll also offer a host of practical strategies for improving business operations. If you are interested in CABS, please visit our webpage at www.cityu.sk/cabs or send an e-mail to cabs@cityu.sk.
