

Memorandum

To: all students
Fr: Associate Dean, Associate registrar
Re: registration
Da: 8.2.2007

It is solely students' responsibility to choose and register for courses only according to their program plan. Students are required to keep program plans updated after each registration.

During the registration period, students will be advised only about space availability in the given sections.

It is too late to explain the program plans during the registration period.

If you need advice about required courses, prerequisites etc. or if you do not have program plan, visit your student advisor before the end of this term. Knowledge of your program plan will make the registration faster and more efficient.

Students with cumulative GPA below required level (2.0 undergraduate programs, 3.0 graduate programs) are not eligible to register without official approval from readmission committee.
